SUMMARY

Results-driven Software Engineer with 1+ years of experience in building scalable full-stack and cloud-native applications. Skilled in leading development, optimizing CI/CD, and integrating AI into modern tech stacks. Eager to contribute to innovative, high-impact engineering teams.

EDUCATION

Bachelors in Information Technology Jul 2022 - April 2025
Ghanshyamdas Saraf College, University of Mumbai

EXPERIENCE

Engineering Lead - 26ideas Aug 2024 - Mar 2025
- Built a CRM to centralize business data (contacts, jobs, candidates, ideas) from third-party platforms using Next.js, NestJS, and Google APIs.
- Integrated contextual search (RAG) using OpenAI embeddings and App Script for Gmail sync.
- Led infrastructure setup with Docker, AWS S3/E2, and CI/CD pipelines for scalable microservices.

Software Engineer Intern - 26ideas Apr 2024 - Jul 2024
- Built a resume classification microservice to auto-group candidates by skills, experience, and roles for the recruitment platform.
- Developed a middleware service to summarize Typeform responses using OpenAI and deliver insights via email.

PROJECTS

AI-CRM - [Link] Nextjs, Microservices, API Gateway, Spring Boot, Docker
- An AI-powered CRM platform designed to streamline business operations by centralizing contact, job, candidate, company, and idea data.
- Scalable microservice architecture to support independent feature deployment, seamless third-party integrations, and intelligent data processing. Services : User, Auth, Contact, Company, etc

Kya Banana Hai - [Link] Nextjs, AWS S3, Postgres, OpenAI, Dalle, AWS Amplify
- A smart kitchen assistant that helps you decide what food to cook based on ingredients, time, mood, or dietary needs — using the power of AI.

Shortify - [Link] Spring Boot, Java, Reactjs, MySQL, Docker
- A modern, full-stack URL shortening application that enables users to convert lengthy URLs into concise, shareable links.

Codetech - [Link] Reactjs, firebase, Leetcode, Code Compiler, AWS EC2
- An interactive platform designed for competitive programmers and developers to solve coding challenges in a LeetCode-style environment.

TECHNICAL SKILLS

- **Programming Languages :** Java, JavaScript, TypeScript, Python, C, C++
- **Libraries/Frameworks :** Next.js, Nestjs, Prisma, React, Streamlit, Spring Framework, Spring Boot
- **Tools/Platforms :** Git, Shell, WebSockets, Jenkins, Anisible, Docker, Kubernetes, Terraform, Kafka, Redis Databases PostgreSQL, MySQL, MongoDB, Firebase

CERTIFICATIONS

- Winner: Code War & Technowizz (Algorithmic Challenges)
- DevOps Certification – Udemy
- Avishkar Research Foundation Award for Innovation
- Java Spring Framework 6 with Spring Boot 3 - Udemy Course
